PROJECTS

Project 1			
Project Name	**Stacker Wallet (Client: Nets, Denmark)**	**Team Size**	6
Start Date	Nov 2017	**End Date**	Apr 2019
Project Description	Stacker Wallet – A digital wallet that will be used for making micro payments when user wishes to read any premium article from Danish Merchant site. The entire transaction and payment flow will be maintained on Blockchain using stellar as the base platform. The Wallet is integrated with NetAxept payment gateway		
Role & Contribution	My responsibilities as a UI Developer are • Requirement gathering and time estimation. • To develop mobile responsive screens provided by UX team and need to build the react components. • Integration with back-end API for displaying dynamic react component. • To rectify/ resolve GIT merge issues, if any. • To attend daily Scrum calls.		
Tools& Technology	Html, CSS, JQuery, React JS, Ajax, Git, VS Code		

Project 2			
Project Name	**Full compass**	**Team Size**	2
Start Date	Feb 2017	**End Date**	Oct 2017
Project Description	It is an e-commerce website which deals with musical instruments for their B2B and B2C customers. This project was developed for few of the enhancements required as per business needs.		

Role & Contribution	• My responsibilities as a Developer were to develop below enhancements:
	  o Parts FAQ: This module was developed for all the product related FAQ's.
	  o Product Parts: This module was developed to list down the parts of a product as well as products related to the part.
	  o Review and Ratings: It is used to capture the product's feedback and ratings.
	• To deliver fully tested product including Unit and Integration Testing.		

Tools & Technology	PHP, MySQL, HTML5, CSS3, JavaScript, jQuery&Ajax		
Key Achievements	o Client suggested buy option from a 3rd party vendor but as per our (we represented LTI) suggestion, we developed a better featured product. o There was 100% acceptance from client with 0 UAT defects.
